

TFi-30 Desktop Mailer

Fast, easy and efficient mailing solution
for any size organisation

TWOFOLD
MAILING

The paperless office is still a very long way off and until it arrives, the monotonous task of folding documents, inserting them into envelopes and sealing them will remain a burden to the busy office

TFi-30

The TFi-30 folds, inserts and seals all in one quick and efficient solution.

Speed and efficiency

All offices need to send out invoices, remittance advices, letters, mailshots, cheques or other office documents, but why waste valuable staff resources on these boring tasks when a Twofold TFi-30 Desktop Mailer can do them in a fraction of the time whilst saving you money?

Truly compact

The Twofold TFi-30 is a compact mailing machine designed for any size organisation. This desktop machine has a footprint area of less than an average A3 Multi Function Device and whilst it may be small in size, it has an output of up to 1350 documents per hour (5 times faster than the average laser printer!). It can handle a variety of document sizes and will insert into envelopes of up to C5 (half A4) size, which could reduce your postal costs.

Easy to use

Nine different jobs or applications can be electronically stored in the machine, and can be recalled at the touch of a button. It could not be simpler – even for the occasional user. Unlike other Folder Inserters there is no need to prefan either envelopes or documents to avoid potential feeding jams. Letterheads always face the operator making it obvious which way round the stationery needs to be loaded – making training really simple.

Clam shell access

The TFi-30 Desktop Mailers are so easy to use. In the unlikely event of a stoppage, their “Clam Shell” design allows you instant access to the complete paper and envelope path. This means no damaged documents and no need for specialised operators.

Security

The double document detection facility ensures only the correct number of sheets go into the envelope. This is vitally important when sending out cheques or confidential mail.

Why choose a Folder Inserter?

With the introduction of Royal Mail's new Pricing in Proportion tariff, where mail is now priced according to size as well as weight, folding using a TFi-30 can save you up to 40% of your postal costs.

Specification	TFi-30
Type of fold	Letter/Single/Double Parallel/No Fold
Automatic feeding stations	3
Semi-automatic feeding station	Yes
Main feeder capacity	2x 100 sheets
Small format feeder capacity	Up to 200 inserts
